

## Crossings

The *MUTCD* now recommends the same sign (W11-1 or W11-2) for use both as an advance warning device and at the actual crossing location. Section 2C.37 describes the use of these signs and requires the use of a supplemental downward pointing arrow (W16-7P) at the crossing location if a crosswalk is not delineated with pavement markings.

**W11-2 and W16-7p**
